DETAILED ACTION

Allowable Subject Matter

1. Claims 9,11 and 13-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record neither discloses nor teaches a liquid crystal display device comprising various elements as claimed, more specifically, as the following:

a light emitting surface of the light emitting device including a light emission point and a projection portion, the light emission point confronting the light receiving surface, the projection portion being disposed at a position other than where the light emission point confronts the light receiving surface of the light guide, and using flexible substrate locates the projection portion of the light emitting surface into the recessed portion of the light receiving surface so as to mount the light emitting device into the light receiving surface of the light guide as shown in Figs.1-2 and the projection structure as shown in Fig.7 [claims 9 and 20].

The closest references such as JP 2000-098415 discloses that using flexible substrate to mount the light emitting diode into the light guide, but it does not show using projection other than the light emitting point to mount the light emitting diode into the light guide, and the reference Satoh discloses that using LED as projection and through hole as recession portion, but it does not discloses the mounting structure as claimed to use projection other than the light emitting point to mount the light emitting device into the light guide.
